Contents

No 1  FEBRUARY 1980

Procedures for screening chemicals for carcinogenicity
I F H Purchase .................................................. 1

Dust exposure and mortality in chrysotile mining, 1910-75
J C McDonald, F D K Liddell, G W Gibbs, G E Eyssen, and A D McDonald ..... 11

Concentrations and dimensions of coated and uncoated asbestos fibres in the human lung
A Morgan and A Holmes ........................................ 25

Nature, structure, and properties of asbestos cement dust
J Baeten, J Helsen, A Deruyttere ................................ 33

Predictable “individual differences” in uptake and excretion of gases and lipid soluble vapours simulation study
Vera Fiserova-Bergerova, Jiri Vlach, and Janet C Cassady ......................... 42

Effects of urinary volume on urinary concentrations of lead, delta-aminolaevulinic acid, coproporphyrin, creatinine, and total solutes
S Araki ......................................................................... 50

Microbial and immunological investigations and remedial action after an outbreak of humidifier fever
J H Edwards .............................................................. 55

Reproducibility of pulmonary function tests under laboratory and field conditions
R G Love, M D Attfield, and K D Isles .................................. 63

Interaction of calcium and lead in human erythrocytes
C N Ong and W R Lee .................................................. 70

Distribution of lead-203 in human peripheral blood in vitro
C N Ong and W R Lee .................................................. 78

Mortality of workers on an isopropyl alcohol plant and two MEK dewaxing plants
M R Alderson and N S Rattan .......................................... 85

Notes and miscellaneous
Unusual presentation of Osgood-Schlatter’s disease
E S Hodgson, Y S Kaplan, and N R V Edmonds ................................. 90

Book reviews .................................................................. 91

Information section .......................................................... 93

No 2  MAY 1980

In-vivo determination of lead in the skeleton after occupational exposure to lead
L Ahlgren, Birgitta Haeger-Aronsen, S Mattisson, and A Schütz .................... 109

Incidence of cancer among ferrochromium and ferrosilicon workers
S Langård, Aa Andersen, and B Gylseth ......................................... 114

Mortality and incidence of tumours among ferrochromium workers
G Axelsson, R Rylander, and A Schmidt ......................................... 121

Effect of kidney damage on the mobilisation of mercury by thiol-complexing agents
S K Tandon and L Magos .................................................. 128

A neurological and biochemical study of early lead poisoning
Judith A S Ashby ................................................................ 133

Interaction of atopy and exposure to cotton dust in the bronchoconstrictor response
R N Jones, B T Butcher, Y Y Hammad, J E Diem, H W Glindmeyer, III, S B Lehrer, J M Hughes, and H Weil ......................... 141

Lung function in workers exposed to polyvinyl chloride dust
C P Chivers, C Lawrence-Jones, and G M Paddle ............................... 147

Effects of exposure to slate dust in North Wales
J R Glover, Carol Bevan, J E Cotes, P C Elwood, N G Hodges, R L Kell, C R Lowe, Margery McDermott, and P D Oldham ......................... 152

Mortality experience of 161 employees exposed to ethylene dibromide in two production units
M G Ott, H C Scharnweber, and R R Langner .................................... 163

Chemical and photoelectron spectrometry analysis of the adsorption of phospholipid model membranes and red blood cell membranes on to chrysotile fibres
M C Jaurand, J H Thomassin, P Baillif, L Magne, J C Touray, and J Bignon 169
Contents

Pattern of accident distribution in the telecommunications industry
   P R Davis and N J Sheppard 175

Healthy worker effect in the total Finnish population
   K Vinni and M Hakama 180

N-N-Dimethylformamide concentration in environmental and alveolar air in an artificial leather factory
   F Brugnone, L Perbellini, and E Gaffuri 185

Use of a simple body-monitoring system in a pilot study on workers exposed to unsealed gamma-ray emitting material
   T Sumerling 189

A personal dust sampler simulating variable human lung function
   R Kucharski 194

Notes and miscellanea

Carboxyhaemoglobin levels in workers in Leicestershire garages
   C L Waite 197

Book reviews 198

Notices 200

Information section 201

No 3 AUGUST 1980

Angiosarcoma of the liver: annual occurrence and aetiology in Great Britain
   P J Baxter, P P Anthony, R N M Macsween, and P J Scheuer 213

Adenocarcinoma of the nose and paranasal sinuses in shoemakers and woodworkers in the province of Florence, Italy (1963-77)
   F Cecchi, E Buiaatti, D Kriebel, L Nastasi, and M Santucci 222

A 20-year follow-up of men aged 55-64 including coal-miners and foundry workers in Staveley, Derbyshire
   A L Cochrane and F Moore 226

A 20-year follow-up of a population sample (aged 25-34) including coal-miners and foundry workers in Staveley, Derbyshire
   A L Cochrane and F Moore 230

An investigation of the acute behavioural effects of styrene on factory workers
   Nicola Cherry, H A Waldron, G G Wells, R T Wilkinson, H K Wilson, and Sally Jones 234

A comparative study on the neurotoxicity of n-pentane, n-hexane, and n-heptane in the rat
   Y Takeuchi, Y Ono, N Hisanaga, J Kitoi, and Y Sugiuara 241

Occupational type bronchial provocation tests: testing with soluble antigens by inhalation
   M G Harries, P S Burge, and I M O'Brien 248

Changes in lung function after exposure to vanadium compounds in fuel oil ash
   R E M Lees 253

Radiological findings as predictors of mortality in Quebec asbestos workers
   F D K Liddell and J C Mcdonald 257

Effect of smoking on attack rates of pulmonary and pleural lesions related to exposure to asbestos dust
   G H G McMillan, R J Pethybridge, and G Sheers 268

Clearance of asbestos bodies from the lung: a personal view
   K J Arul and P F Holt 273

Cadmium-induced osteomalacia
   J D Blaney, R G Adams, D B Brewer, and T C Harvey 278

Application of mathematical modelling for assessing the biological half-times of chromium and nickel in field studies
   A Tossavainen, M Nurminen, P Mutanen, and S Tola 285

High affinity of lead for fetal haemoglobin
   C N Ong and W R Lee 292

48-hour ambulatory electrocardiography in dynamite worker and controls
   C Hogstedt, B Soderholm, and L Bodin 299

Fever induced by fluorine-containing lubricant on stainless steel tubes
   B Akesson, B Hogstedt, and S Skerfving 307

Information section 310
Contents

No 4  NOVEMBER 1980

Epoxides—is there a human health problem?
Margaret M Manson ............................ 317

Deposition, retention, and clearance of inhaled particles
M Lippmann, D B Yeates, and R E Albert ............................ 337

Observations on the lungs of vanadium workers
M Kiviluoto .................................. 363

Pulmonary disease from occupational exposure to an artificial aluminium silicate used for cat litter
A W Musk, H W Greville, and A E Tribe ............................ 367

Retention of vinyl chloride in the human lung
J Krajewski, M Dobecki, and J Gromiec ............................ 373

Scanning electron microscopy and x-ray microanalysis of mineral deposits in lungs of a patient with pleural mesothelioma
E M Ophus, G Mowé, K K Osen, and B Gylseth ............................ 375

Effects of chronic ethanol consumption on hepatic metabolism of aromatic and chlorinated hydrocarbons in rats
A Sato, T Nakajima, and Y Koyama ............................ 382

Influence of chronic carbon disulphide intoxication on the development of experimental atherosclerosis in rats
Teresa Wrońska-Nofer, S Szendzikowski, and Maria Obrebska-Parke ............................ 387

Placental and stillbirth tissue lead concentrations in occupationally exposed women
A K Khera, D G Wibberley, and J G Dathan ............................ 394

Leptospira hebdomadis associated with an outbreak of illness in workers on a farm in North Yorkshire
S M Crawford and D W Miles ............................ 397

Role of family susceptibility, occupational and family histories and individuals’ blood groups in the development of silicosis
M H Noweir, M Moselhi, and E Amine ............................ 399

Notes and miscellanea

Effects of exposure to slate dust in North Wales
A Jones .................................. 405

Book reviews ................................ 407

Information section ............................ 409
