

“This book is a beauty!”

I found it interesting and it answered many questions I had on the respiratory consequences of AIDS—plus many I wouldn't have even thought of. This book has great value for all practitioners (from medical students to specialists) who deal with AIDS and the lung.”

The Medical Journal of Australia

In *AIDS and the lung* experts review the problems, emphasising practical points and providing up to date information on this rapidly changing subject. Edited by David Mitchell, consultant physician in respiratory medicine, St Mary's Hospital, London, and Ashley Woodcock, consultant chest physician, Wythenshawe Hospital, Manchester, *AIDS and the lung* is an indispensable handbook for respiratory physicians, especially those with limited experience of dealing with AIDS—and for everyone concerned with protective measures in bronchoscopy units and pulmonary function laboratories.

UK £8.95; Abroad £10.00

BMA members £8.45 or £9.50 including postage, by air abroad

Available from: BRITISH MEDICAL JOURNAL, PO BOX 295, LONDON WC1H 9TE, any leading bookseller or the BMJ bookshop in BMA House.

Please enclose payment with order, or send us full details of your MASTERCARD, VISA or AMERICAN EXPRESS credit card.

How is no longer a problem — but there's still which and why

The microcomputer revolution has made powerful machines and highly complex programs generally available. This means that users of statistical techniques need no longer be concerned with the arithmetical and algebraic details — the software will take care of all that. What is vital, however, is to understand the ideas and the basic principles of statistical analysis. In *Medical Statistics on Microcomputers* R A Brown and J Swanson Beck show how to get the best use out of microcomputers when analysing data, particularly in the pathology laboratory. They explain the rational basis of various widely applicable statistical methods and also indicate their limitations so that you can make an informed choice. Chapters include:

- Data handling
- Analysis of data from one or two groups
- Comparison of several groups
- Analysis of categorical data
- Statistical methods for diagnostic tests.
