

ICOEE

Intensive Course in Occupational and Environmental Epidemiology

Hua-Hin, Thailand

November 3-7, 1996

Introduction The Intensive Course in Occupational and Environmental Epidemiology (ICOEE) is a five-day instructional course on practical epidemiological approaches to environmental and workplace health research. The ICOEE is designed for physicians and other health professionals and managers with research interests or responsibilities relevant to the workplace and general environments. No prior epidemiological training is required.

The course presents modern epidemiological concepts and methods for study design, data analysis and critical interpretation of published findings. The most useful applications of the epidemiological perspective are emphasized and illustrated with examples from actual studies. Instructors draw on published studies as well as their own research experience to provide insights on conducting studies on environmental and occupational health concerns.

Faculty Dr. Kenneth Mundt, University of Massachusetts and Applied Epidemiology, Inc., Amherst, Mass. Dr. Paul E. Leaverton and Dr. Thomas Mason, University of South Florida

Accommodations The ICOEE will be held at the Royal Garden Resort in Hua-Hin, Thailand. Tuition for the course will be US\$ 1200 plus approximately US\$ 800 for the hotel (including breakfast and lunch). Some scholarships will be available.

For more information please contact:
Walter Dieckmann, ICOEE Manager,
Ruhr University Bochum, D-44780 Bochum, Germany
phone: +49 234 700 5162
fax: +49 234 7094 325
e-mail: Walter.Dieckmann@rz.ruhr-uni-bochum.de

This ICOEE is co-hosted by Mahidol University Bangkok, Applied Epidemiology, Inc., and Akademie fuer oeffentliche Gesundheit, Ruhr-University Bochum, and underwritten by The World Bank, BASF and Bayer.

Applying science to health care

Evidence based medicine is the buzz word in health care today but the concept that the design and function of health services should also be based on scientific evidence is less familiar and more radical. Grown out of a ground breaking conference, *The Scientific Basis of Health Services* examines how the activities of health services can be rooted in research.

Chapters include:

- Economic evaluation and clinical practice
- The role of the consumer in health research
- Evidence based management in health care
- Shifting the balance between primary and secondary care

With contributions from leading international figures, this unique book points the way to the future and is essential reading for all involved in the design and management of health services.

Available from: BMJ Publishing Group, PO Box 295, London WC1H 9TE, medical booksellers or the BMJ bookshop in BMA House.
