Conclusions The assessment and prevention of occupational risks are a major asset to improve the quality of work and retain employees through a better quality of work life.

**0426 OCCUPATION AND LEUKAEMIA IN SPAIN 2007–2012**

1Maria M Rodríguez, 2Ana Fernández-Somoano, 3Juan Alguacil, 4Víctor Carreira, 5José M Oliva, 6Miguel Santibañez, 7Manolis Kogevinas, 8Pilar Sanz, 9Marta M Rodríguez, 2Ana Fernández-Somoano, 3Juan Alguacil, 4Víctor Carreira, 5José M Oliva, 6Miguel Santibañez, 7Manolis Kogevinas, 8Pilar Sanz

Objective: Established risk factors for leukaemia do not explain the majority of leukaemia. Previous studies have suggested the importance of occupation in leukaemogenesis.

To evaluate associations between job title and leukaemia in the population the MCC-Spain

We studied occupational variation of the risk of chronic lymphocytic leukaemia

Method: We have 30 744 occupational interviews recruited during 2007 to 2012 all were codified on 67 group homogeneous units, according to a defined criteria, in the same category defined by a set of tasks of the same characteristics. We analysed 196 cases of leukaemia (aged 20–75 years) and yours controls
0423 Development of a disease surveillance system for Silicosis and respiratory disorders in stone carving workers in Thailand
Krittin Silanun
