Name: Geoffrey M. Calvert

Position: Deputy Editor, Occupational & Environmental Medicine

I have read and understood the BMJ policy on declaration of interests and declare the following interests:

I am employed fulltime at the National Institute for Occupational Safety and Health (NIOSH), which is part of the Centers for Disease Control and Prevention. At NIOSH, I am a Team Leader and senior medical officer. I am involved with research on a wide range of occupational health and safety topics including acute pesticide-related illness, work-related cancer, hearing loss, and lead poisoning. The data used in my research comes from a variety of sources including state health departments, nationally representative surveys (e.g. the National Health Interview Survey) and administrative records (e.g. death certificates and central cancer registry reports). Funding for all of my research activities is provided by the US Government (i.e. NIOSH and the Environmental Protection Agency (EPA)). On occasion, I receive in-kind travel support from BMJ to speak at scientific conferences. On rare occasions, I receive in-kind travel support to speak at scientific conferences by other professional or scientific organizations. I have never received speaking fees, and my current employment prohibits me from accepting such fees. I am an appointed member of the Pesticide Program Dialogue Committee, a committee created to provide guidance to EPA on matters involving pesticide regulations. In addition, I am a member of the editorial board of the "Safety and Health @ Work" journal and the "Journal of Agromedicine", both of which are unpaid. I am also a Volunteer Associate Professor of Environmental Health, Department of Environmental Health, University of Cincinnati College of Medicine, which is unpaid. I personally own stock in approximately 70 publicly-traded corporations covering a very broad range of industry sectors, including biomedical and pharmaceutical companies. The amount of stock I own in any one corporation ranges from \$2,000 to \$32,000.
