

INDOCID[®]

Indomethacin

Suppositories

'Indocid' is supplied as 100 mg suppositories and also as 25 mg capsules. Detailed information is available to physicians on request.

Merck Sharp & Dohme Limited, Hoddesdon, Hertfordshire. Telephone, Hoddesdon 67123

In the arthritic disorders 'Indocid' Suppositories offer relief of pain *all through the night*

'Indocid' Suppositories are particularly valuable for the relief of the night pain and morning stiffness experienced by many arthritic patients. The *prolonged* relief of pain afforded by 'Indocid' Suppositories amply justifies this method of administration.

'When 100 mg. [suppository] was given last thing at night, not only was early-morning stiffness relieved but pain was lessened until midday, up to 16 hours.' *Brit.med.J.*, 1965, 1, 1354 (22 May).

An invaluable X-Ray Service to I.M.O.s, throughout the country

Portable X-Rays Limited are regularly employed by industrial organisations for chest examinations of workers and staff on site. Full size films are supplied, thus providing an invaluable means of detecting pulmonary affections, especially where dust hazard still exists.

The services includes

- Full size films
- Chest examinations for workers on site
- New entrants examined at frequent periods
- Night-shift workers X-rayed during working hours
- Annual survey of entire staff
- Periodical visits at monthly or other intervals

Life in your hands? Get a Minuteman there fast!

If a man stops breathing after an accident, you have only seconds in which to save his life. Send for the Minuteman at once, of course—there should be one in every works First Aid department. Meanwhile, get air into the victim's lungs by whatever method of artificial respiration is known to you.

The sooner the Minuteman takes over the better. It is designed to maintain respiration effectively and automatically under any conditions, for as long as may be required. It is self-adjusting to the patient's lung capacity, and can be used even in non-respirable atmospheres, where access is difficult, or where it would be dangerous to move the patient. The built in aspirator quickly clears the air passages of fluids which might otherwise prevent air from reaching the lungs.

The Minuteman is a complete self contained life saving system, which any competent first aider can

quickly learn to use. It has saved hundreds of lives and yet it costs less than £100.

THE BRITISH OXYGEN COMPANY LIMITED
 Medical Department, London W.6.

In the treatment of many surface infections the use of a topically applied antibiotic may be considered unnecessary and extravagant as the non-antibiotic and inexpensive diamidine compounds will often prove equally effective.

DIAMIDINE PREPARATIONS:

- ★ Have a broad spectrum of antibacterial activity
- ★ Diminish the risk of infection with, and are effective against, certain antibiotic-resistant organisms
- ★ Are also effective against certain pathogenic fungi
- ★ Are not inhibited by blood, pus, tears or *p*-aminobenzoic acid
- ★ Are extremely well tolerated and rarely give rise to sensitization reactions
- ★ Maintain their potency almost indefinitely without special conditions of storage

Full information is available on request

How commonsense can you get...

Haelan is a new preparation for steroid-responsive skin conditions.

Its advantages are strictly practical.

Haelan contains a proven steroid, flurandrenolone, in a concentration sufficient to treat all but the most severe dermatoses.

It comes in a realistic 60 gramme tube—enough for routine treatment without the need for repeat prescriptions.

Because of the pack size, and because the steroid content has not been needlessly increased, Haelan is far more economical than comparable preparations: the Basic N.H.S. Price for the 60 G. tube is 11/1d.

haelan

a sensible advance in skin treatment

 **DISTA**

Haelan (flurandrenolone 0.0125%) is prepared as cream and ointment, each in 60G. tubes. A special tube Haelan A (flurandrenolone 0.05%) for initial treatment of acute dermatoses.

Safeguard working hands with

ROZALEX
SKIN CARE PRODUCTS

Look after their hands —prevention is better than cure

Pain, discomfort, and a serious loss of man hours are still caused by occupational skin disorders, most of which are preventable. It is important not only to provide suitable barrier creams but also to see that they are used regularly each day.

Three routine measures are desirable. First, application of a barrier cream before work. Then use of the right skin cleanser after work. Finally, the application of a skin conditioning cream as recommended by the Ministry of Labour.

Write now for full details of the wide range of Rozalex skin care products, which meet all three requirements, in every industry. Advice is obtainable from the Rozalex Skin Care Service.

we couldn't improve on Tri-Adcortyl so we formulated

**now you can use
the widest-spectrum skin treatment
for 'wet' eczemas too!**

Where all other corticosteroids have failed Tri-Adcortyl has often proved highly successful. The reason? Tri-Adcortyl is not only anti-inflammatory and antibacterial — it has a highly-effective antifungal action — provided by Nystan (Squibb nystatin). Now, with the new cream base, your problem of choice of skin therapy is reduced to one simple decision — Tri-Adcortyl cream or Tri-Adcortyl ointment: with either you'll have the greatest chance of success.

Tri-Adcortyl cream and ointment: each gram contains triamcinolone acetonide 1 mg., neomycin sulphate equivalent to 2.5 mg. neomycin base, gramicidin 0.25 mg., Nystan (Squibb nystatin) 100,000 units.

Packs of 15 gm.
