# Chest X-Ray Services.

The emphasis of Chest X-Ray Services is on:-

1. The highest quality full-size Chest radiographs.
2. At times convenient to management and men, on site.
3. With modern equipment.
4. In spacious mobile vehicles or static units specially designed for industrial purposes (60 to 100 X-rays per hour), and
5. Rapid provision of radiographs (and report if requested) to works doctor.

Operating from six bases in Great Britain, the mobile and static units of X-ray Services can offer a

convenient system of chest X-ray examination for new entrants, for special and for periodic surveys. For almost 20 years the Medical Service of the National Coal Board has been carrying out chest X-ray examinations of miners and other staff. In the last 10 years, well over 1 million radiographs have been

taken. For Geographical reasons, bases must be maintained throughout the country, but with the reduction in manpower there is now some spare capacity which can be made available to other industries.

For further information, please write or telephone to Medical Service, National Coal Board, Hobart House, Grosvenor Place, London, S.W. 1.  
Telephone No. 01-235 2020, Extn. 254.

MOBILE X-RAY EXAMINATIONS ON SITE

Time occupied 5 mins per man

For **INDUSTRIAL DISEASES OF THE CHEST**

An X-ray service of interest to every I.M.O. throughout Britain

PORTABLE X-RAYS LIMITED are regularly employed by many industrial organisations throughout the country for chest examinations of personnel on site. Apart from the enormous advantages of this method in cases of any industrial hazard, it is an easy and convenient way of making periodic checks on the chests of staff, for example, where large numbers work in close proximity with each other. Night-shift workers can be examined during working hours.

All examinations are carried out on full size films.
