

"This book is a beauty!

I found it interesting and it answered many questions I had on the respiratory consequences of AIDS—plus many I wouldn't have even thought of. This book has great value for all practitioners (from medical students to specialists) who deal with AIDS and the lung."

The Medical Fournal of Australia

In AIDS and the lung experts review the problems, emphasising practical points and providing up to date information on this rapidly changing subject. Edited by David Mitchell, consultant physician in respiratory medicine, St Mary's Hospital, London, and Ashley Woodcock, consultant chest physician, Wythenshawe Hospital, Manchester, AIDS and the lung is an indispensable handbook for respiratory physicians, especially those with limited experience of dealing with AIDS—and for everyone concerned with protective measures in bronchoscopy units and pulmonary function laboratories.

UK £8.95; Abroad £10.00 BMA members£8.45 or £9.50 including postage, by air abroad
