

Occupational and Environmental Health Risks: Measurement and Communication

You are invited to participate at a one day conference organised by the BMJ and *Occupational and Environmental Medicine*.

Risks are an inherent part of life and work but their measurement and communication are not straightforward.

The conference will look at methods of risk assessment, give examples of assessment in different settings, and consider the issues surrounding communication about risk.

This conference should be of particular interest to doctors and other professionals in occupational and public health medicine, environmental health, safety and risk management.

CONFERENCE COST £144.00 + VAT of £25.20, total £169.20

SPECIAL OFFER Discounted journal subscription for delegates to *Occupational and Environmental Medicine* £65.00 (this must be prepaid)

(An annual personal subscription to *Occupational and Environmental Medicine* (formerly *BJIM*) is normally £85.00 for 12 issues.)

The conference fee covers lunch and refreshments throughout the day

Please return the registration form as soon as possible and no later than Friday 14 October
