

EPIDEMIOLOGY FOR THE UNINITIATED

THIRD EDITION

The short authoritative guide to understanding epidemiology.

Epidemiology – the study of disease in relation to populations – is an important aspect of medicine. It has its own techniques of data collection and interpretation and its necessary jargon of technical terms. In

Epidemiology for the Uninitiated Dr David Coggon and Professors Geoffrey Rose and David Barker guide the novice expertly through the theory and practical pitfalls. The third edition of this very popular *BMJ* handbook has been extensively revised and includes a new section on

randomised controlled trials and a new chapter on how to understand and interpret published epidemiological data.

ISBN 0 7279 0770 0 1993
Price: Inland £6.95
Abroad £8.00

FACULTY OF OCCUPATIONAL MEDICINE
of the Royal College of Physicians

ESSO RESEARCH FELLOWSHIP

Through the generosity of Esso UK plc, the Faculty of Occupational Medicine is able to invite applications for a Research Fellowship in occupational medicine.

The appointment will be tenable for one year in the first instance, with the prospect of extension for one further year and funding of up to £30,000 per annum will be available for the programme.

Neither a medical qualification nor membership of the Faculty is an essential requirement.

A brief outline of the proposed approach should be included, but a detailed protocol is **not** required at this stage.

Applications, accompanied by a full CV, should be submitted to:

Faculty of Occupational Medicine
of the Royal College of Physicians
6 St Andrew's Place
LONDON
NW1 4LB

The closing date for applications is **31 March 1995**.
