

OCCUPATIONAL HEALTH PHYSICIAN

SANDWICH, KENT

Pfizer is one of the most successful research based international pharmaceutical companies in the country and our aim is to be the industry leader by the turn of the century.

Naturally our staff are of prime importance to us, which is why we are seeking an additional Occupational Health Physician to oversee their healthcare needs.

Reporting to the Senior Occupational Health Physician, you will be responsible for the physical, mental and social well-being of all our employees and ensure

every measure is taken to prevent health problems arising from their work. Providing advice to management on medical matters, maintaining records and monitoring sickness absence also forms part of your vital role.

With full UK registration, AFOM or higher medical qualification and experience in occupational health, you will be used to liaising with management and have a compassionate approach.

As well as an excellent salary we offer a wide variety of work and a very attractive benefits package.

Please send your CV quoting reference 812 to Jane Booth, Riley Consultancy, 4 Red Lion Court, London EC4A 3EN. Tel: 0171 353 3223. Fax: 0171 353 2338. Closing date: 3rd June 1996.

Applying science to health care

Evidence based medicine is the buzz word in health care today but the concept that the design and function of health services should also be based on scientific evidence is less familiar and more radical. Grown out of a ground breaking conference, *The Scientific Basis of Health Services* examines how the activities of health services can be rooted in research.

Chapters include:

- Economic evaluation and clinical practice
- The role of the consumer in health research
- Evidence based management in health care
- Shifting the balance between primary and secondary care

With contributions from leading international figures, this unique book points the way to the future and is essential reading for all involved in the design and management of health services.

Scientific Basis of Health Services
