Subject index

2-naphthylamine, Translating evidence about occupational conditions into strategies for prevention, 205
2-propanol, Are women more sensitive than men to 2-propanol and m-xylene vapours?, 759
absenteeism, Do mental disorders matter? A study of absenteeism among care seeking Gulf War veterans with ill defined conditions and musculoskeletal disorders, 532
High physical work load and low job satisfaction increase the risk of sickness absence due to low back pain: results of a prospective cohort study, 223
acoustic rhinometry, Nasal patency is related to dust exposure in woodworkers, 23
acute effects, Are women more sensitive than men to 2-propanol and m-xylene vapours?, 759
adolescent, Long term medical conditions: career prospects, 851
aetiology, Sunlight and mortality from breast, ovarian, colon, prostate, and non-melanoma skin cancer: a composite death certificate based case-control study, 257
age, Temporal and spatial relations between age specific mortality and ambient air quality in the United States: regression results for counties, 1960–97, 156
aging, Chronic neck and shoulder pain, age, and working conditions: longitudinal results from a large random sample in France, 337
AIDS, global impact of AIDS on work, 280
air pollution, Associations between daily mortalities from respiratory and cardiovascular diseases and air pollution in Hong Kong, China, 30
Effect of air pollution and environmental tobacco smoke on serum hyaluronate concentrations in school children, 124
Effects of air pollution on changes in lung function induced by exercise in children with chronic respiratory symptoms, 129
Effects of air pollution on general practitioner consultations for upper respiratory diseases in London, 294
Exposure to carbon monoxide and nitrogen dioxide in enclosed ice arenas, 224
Implementation of the Stockholm Treaty on Persistent Organic Pollutants, 651
Mind and matter: OEM and the World Trade Center, 145
Personal exposure monitoring of particulate matter, nitrogen dioxide and ozone, including susceptible groups, 671
The EMECAM project: a multicentre study on air pollution and respiratory symptoms and mortality in Spain: combined results for particulates and for sulphur dioxide, 140
air quality, Temporal and spatial relations between age specific mortality and ambient air quality in the United States: regression results for counties, 1960–97, 156
airway diseases, Respiratory symptoms, lung function, and nasal cellularity in Indonesian wood workers: a dose-response analysis, 338
airway symptoms, Work related symptoms among sewage workers: a nationwide survey in Sweden, 562
allergy, Natural rubber latex allergy, 419
alternative medicine, Complementary and alternative medicine: what is it all about?, 140
altitude, Cosmic rays: are air crew at risk?, 428
alveolitis, Fever and neutrophilic alveolitis caused by a vanadium based catalyst, 785
amalgam, Mercury and dentists, 285
antineoplastic agent, Occupational exposure to cytotoxic drugs in two UK oncology wards, 608
arsenic, Nested case-control study of lung cancer in four Chinese tin mines, 113
asbestos, Asbestos fibreyears and lung cancer: a two phase case-control study with expert exposure assessment, 410
Chrysotile and tremolite asbestos fibres in the lungs and parietal pleura of Corsican goats, 643
Joint action of smoking and asbestos exposure on lung cancer, 494
Joint action of smoking and asbestos exposure on lung cancer, 494
Mind and matter: OEM and the World Trade Center, 145
Translating evidence about occupational conditions into strategies for prevention, 205
ash, Pulmonary epithelial response in the rat lung to instilled Montserrat respirable dusts and their major mineral components, 466
asthma, Methodological problems in a case-referent study based on a prospective cohort study, 63
Methodological problems in a case-referent study based on a register of occupational asthma, 63
Non-malignant mortality among Norwegian silicon carbide smelter workers, 345
Work related asthma, 503
attitude, Knowledge, attitude, practice, and toxicity symptoms associated with pesticide use among farm workers in the Gaza Strip, 387
Austria, Bushfires: are we doing enough to reduce the human impact?, 215
β-glucanase Response to a case of occupational asthma due to the enzymes phytase and β-glucanase, 64
back pain, Ineffective disability management by doctors is an obstacle for return-to-work: a cohort study on low back pain patients sicklisted for 3–4 months, 729
Working hours spent on repeated activities and prevalence of back pain, 680
baker's asthma, Baker's asthma, 498
Translating evidence about occupational conditions into strategies for prevention, 205
benzene, Translating evidence about occupational conditions into strategies for prevention, 205
biological monitoring, Occupational exposure to cytotoxic drugs in two UK oncology wards, 608
biological warfare, The risk to the United Kingdom population of zinc cadmium sulfide dispersion by the Ministry of Defence during the “cold war”, 13
bioreactivity, Pulmonary epithelial response in the rat lung to instilled Montserrat respirable dusts and their major mineral components, 466
birth defect, Review of recent epidemiological studies on paternal occupations and birth defects, 149
Risk of birth defects by parental occupational exposure to 50 Hz electromagnetic fields: a population based study, 92
bisphenol A diglycidyl ether, Urinary bisphenol A and plasma hormone concentrations in male workers exposed to bisphenol A diglycidyl ether and mixed organic solvents, 625
bisphenol A, Urinary bisphenol A and plasma hormone concentrations in male workers exposed to bisphenol A diglycidyl ether and mixed organic solvents, 625
bitumen, Validity of empirical models of exposure in asphalt paving, 620
bladder cancer, Risk of bladder cancer in foundry workers: a meta-analysis, 655
Translating evidence about occupational conditions into strategies for prevention, 205
blood lead, Lead induced increase of blood pressure in female lead workers, 734
blood pressure, Lead induced increase of blood pressure in female lead workers, 734
Book reviews, Frick K, Jensen PL, Quinlan M, et al. Systematic occupational exposure to magnetic fields: a population based study, 149
Holden C, Osiere L. Pocket Guide to Eczema and Contact Dermatitis, 202
Jacobs J, Guertin J, Herron C, editors. MTBE: Effects on soil and groundwater resources, 139
Lomax JD, Johanning E. Occupational medicine, 139
WHO Expert Committee on Vector Biology and Control, editors, Chemistry and Specifications of Pesticides (WHO Technical Report Series 988), 202
body fluid exposure, Out of hours management of occupational exposures to blood and body fluids in healthcare staff, 415
brain tumour, Occupational exposure to magnetic fields, 496
Occupational exposure to magnetic fields, 496
breast milk, Effects of maternal exposure to cadmium on pregnancy outcome and breast milk, 394
bronchial provocation tests, Fever and neutrophilic alveolitis caused by a vanadium based catalyst, 785
burn, Bushtires: are we doing enough to reduce the human impact?, 215
bushtire, Bushtires: are we doing enough to reduce the human impact?, 215
business, International business travel: impact on families and travellers, 309
cadmium poisoning, Influence of years engaged in agriculture and number of pregnancies and deliveries on mortality of inhabitants of the Jinzu River basin area, Japan, 847
cadmium, Effects of maternal exposure to cadmium on pregnancy outcome and breast milk, 394
The risk to the United Kingdom population of zinc cadmium sulfide dispersion by the Ministry of Defence during the “cold war”, 13
cancer, Cancer at sea: a case-control study among male Finnish
Cancer incidence and magnetic field exposure in industries using
resistance welding in Sweden, 481
Sunlight and mortality from estuar, ovarian, colon, prostate, and
non-melanoma skin cancer: a composite death certificate
based case-control study, 257
Updated epidemiological study of workers at two California petro-
leum refineries, 1950–95, 246
carbon monoxide, Personal exposure monitor-
ing of particulate matter, nitrogen dioxide, and carbon monox-
ide, includes susceptible groups, 571
carbon monoxide, Effects on health of prolonged exposure to low
concentrations of carbon monoxide, 708
cardiovascular disease, Associations between daily mortalities from
respiratory and cardiovascular diseases and air pollution in
Hong Kong, China, 30
Increase in interleukin-6 and fibrinogen after exposure to dust in
tunnel construction workers, 137
Mortality from cardiovascular diseases and exposure to inorganic
mercury, 484
The EMECAM project: a multicentre study on air pollution and
mortality in Spain: combined results for particulates and for sul-
fur dioxide, 300
career, Long term medical conditions: career prospects, 851
carpal tunnel syndrome, Active epidemiological surveillance of
musculoskeletal disorders in a shoe factory, 452
case-control studies, Myocardial infarction risk and occupational
categories in Kaunas 25–64 year old men, 745
Occupational exposure assessment in case-control studies:
opportunities for improvement, 575
Systemic sclerosis and occupational risk factors: a case–control
study, 545
case–referent study, Methodological problems in a case–referent
study based on a register of occupational asthma, 63
Methodological problems in a case–referent study based on a
register of occupational asthma, 63
CCF, Different responses of Ross River virus to climate variability
between coastline and inland cities in Queensland, Australia, 739
cellulose, Respiratory symptoms and diseases among workers in
the soft tissue producing industry, 830
chemical disasters, Episodes of environmental poisoning
worldwide, 855
chemical incidents, Epidemiological assessment of health effects
from chemical incidents, 55
chemical industry, Episodes of environmental poisoning
worldwide, 855
children, Effluents from a pulp and paper mill: a skin and health
survey of children living in upstream and downstream villages,
373
Chinese medicine book reviews, 496
chlorination, Distribution and determinants of trihalomethane con-
centrations in indoor swimming pools, 243
chronic bronchitis, Non-malignant mortality among Norwegian
silicon carbide smelter workers, 345
chronic peripheral neuropathy, Clinical validation of methods of
diagnosis of neuropathy in a field study of United Kingdom
sheep dippers, 442
climate, Different responses of Ross River virus to climate variability
between coastline and inland cities in Queensland, Australia, 739
cohort mortality study, Mortality and cancer morbidity of produc-
tion workers in the UK flexible polyurethane foam industry:
updated findings, 1998–98, 751
cohort studies, Comparison of two different approaches for the
analytical data in a prospective cohort study: an application
to work related risk factors for low back pain, 459
Mortality among Japanese construction workers in Mie
Prefecture, 512
Smoking and mortality in 81 344 drivers in Guangzhou, China, 135
Updated epidemiological study of workers at two California petro-
leum refineries, 1950–95, 246
coke oven workers, Cross sectional study on lung function of coke
oven workers: a lung function surveillance system from 1978 to
1990, 816
colour vision, Relation between colour vision loss and
occupational styrene exposure level, 824
complementary medicine, Complementary and alternative
medicines: what is it all about?, 140
genital anomaly, Hazard potential ranking of hazardous waste
landfill sites and risk of congenital anomalies, 768
congenital malformations, Review of recent epidemiological stud-
ei on paternal occupations and birth defects, 149
coke oven workers, Cross sectional study on lung function of coke
oven workers, Increased in interleukin-6 and fibrinogen after
exposure to dust in tunnel construction workers, 9
Mortality among Japanese construction workers in Mie
Prefecture, 512
contact dermatitis, Prevention of work related skin problems: an
intervention study in wet work employees, 556
combinations and glove tests, Effectiveness of the hands-free
technique in reducing operating theatre injuries, 703
control strategies, Translating evidence about occupational condi-
tions into strategies for prevention, 205
coronary heart disease, When reciprocity fails: effort–reward
imbalance in relation to coronary heart disease and health
functioning within the Whitehall II study, 777
social travel, Mental health insurance claims of spouses of
frequent business travellers, 175
cost, Cost-benefit and cost-effectiveness analysis of a disability
prevention model for back pain management: a six year follow
study, 807
CSTV, Exposure to crystalline silica, silicosis, and lung
disease other than cancer in diatomaceous earth industry
workers: a quantitative risk assessment, 36
Pulmonary epithelial response in the rat lung to instilled Monser-
rat respirable dusts and their major mineral components, 466
cross sectional study, Cross sectional study on lung function of
coke oven workers: a lung function surveillance system from
1978 to 1990, 816
delivery, Influence of years engaged in agriculture and number of
pregnancies and deliveries on mortality of inhabitants of the
Riusu River basin area, 767
dental surgeon, Health and neuropsychological functioning of den-
tsists exposed to mercury, 287
dental technican, Respiratory morbidity in a population of French
dental technicians, 398
dentist, Mercury and dentists, 285
depression, Mental Ill health and fitness for work, 714
dermatitis, The prevalence of occupational dermatitis in the UK
printing industry, 487
dermatology, Effluents from a pulp and paper mill: a skin and health
survey of children living in upstream and downstream
districts, 373
determinants, Personal exposure of Paris office workers to
nitrogen dioxide and fine particles, 550
diagnosis, Criteria for the diagnosis of peripheral neuropathies,
425
diagnostic research, Detection of workers sensitised to high
molecular weight allergens: a diagnostic study in laboratory
animal workers, 189
diarrhoea, Work related symptoms among sewage workers:
a nationwide survey in Sweden, 562
diisocyanates, Changes in rates and severity of compensation
claims for asthma due to diisocyanates: a possible effect of
medical surveillance measures, 58
dioxins, Offspring sex ratios of people exposed to dioxin and
dioxin-like compounds, 202
disability, Fatigue as a predictor of work disability, 712
Ineffective disability management by doctors is an obstacle for
return-to-work: a cohort study on low back pain patients
sicklisted for 3–4 months, 729
Risk factors for occupational knee related disability among
women in the US Army, 601
disaster planning, Episodes of environmental poisoning
worldwide, 855
disaster, Mind and matter: OEM and the World Trade Center, 145
disinfectant byproducts, Distribution and determinants of
trihalomethane concentrations in indoor swimming pools, 243
diving, Lung function over six years among professional divers, 629
doctors, Sickness absence in doctors, 201
dose-response, Respiratory symptoms, lung function, and nasal
cellularity in Indonesian wood workers: a dose-response
analysis, 338
Dubai, Working to reduce work disability in rheumatoid arthritis, 566
dust exposure, Increase in interleukin-6 and fibrinogen after expos-
ure to dust in tunnel construction workers, 9
Frequency based case-control study, 512
Occup Environ Med: first published as 10.1136/oem.59.12.e2 on 1 December 2002. Downloaded from http://oem.bmj.com/ on November 3, 2023 by guest. Protected by copyright.
job demand, The changing psychological contract at work, 355
job satisfaction, High physical work load and low job satisfaction increase the risk of sickness absence due to low back pain: results of a prospective cohort study, 323
jostress, Job stress, fatigue, and job dissatisfaction in Dutch lorry drivers: towards an occupation specific model of job demands and control, 356
journal update, Welcome to 2002 with OEM, 1
knowledge, Knowledge, attitude, practice, and toxicity symptoms associated with pesticide use among farm workers in the Gaza Strip, 387
landfill, Hazard potential ranking of hazardous waste landfill sites and risk of congenital anomalies, 768
latex, Natural rubber latex allergy, 419
lead, Neurobehavioural testing in workers occupationally exposed to lead: systematic review and meta-analysis of publications, 217
Neurobehavioural testing in workers occupationally exposed to lead, 648
Sperm count and chromatin structure in men exposed to inorganic lead: lowest adverse effect levels, 234
letter, Leukaemia, Translating evidence about occupational conditions into strategies for prevention, 205
lifting, High physical work load and low job satisfaction increase the risk of sickness absence due to low back pain: results of a prospective cohort study, 323
liver cancer, An increased standardised mortality ratio for liver cancer among vinyl chloride workers in Taiwan, 405
Translation evidence about occupational conditions into strategies for prevention, 205
long term follow up, Influence of solvent exposure and aging on cognitive functioning: an 18 year follow up of formerly exposed floor layers and their controls, 49
longitudinal studies, Comparison of two different approaches for the analysis of data from a prospective cohort study: an application to work related risk factors for low back pain, 459
Lung function over six years among professional divers, 629
low back pain, Comparison of two different approaches for the analysis of data from a prospective cohort study: an application to work related risk factors for low back pain, 459
Cohort and cost-effectiveness analysis of a disability prevention model for back pain management: a six year follow up study, 807
High physical work load and low job satisfaction increase the risk of sickness absence due to low back pain: results of a prospective cohort study, 323
low birth weight, Ambient neighbourhood noise and children’s mental health, 380
Reproductive outcome among female hairdressers, 517
lung cancer, A cohort mortality and nested case-control study of French and Austrian talc workers, 98
Asbestos, A cross-sectional study of workers with chronic respiratory symptoms, 129
A nested case-control study of lung cancer in four Chinese tin mines, 113
Silicosis in the twenty first century, 721
Translating evidence about occupational conditions into strategies for prevention, 205
lung function, Cross sectional study on lung function of coke oven workers: a lung function surveillance system from 1978 to 1990, 816
Effects of air pollution on changes in lung function induced by exercise in children with chronic respiratory symptoms, 129
lung, Pulmonary epithelial response in the rat lung to instilled Montserrat respirable dusts and their major mineral components, 466
Lyme disease, Occupational risk of Lyme disease: an epidemiological review, 75
magnetic field, Cancer incidence and magnetic field exposure in industries using resistance welding in Sweden, 481
Occupational exposure to magnetic fields, 496
manganese, Translating evidence about occupational conditions into strategies for prevention, 205
maritime medicine, Occupational accidents aboard merchant ships, 484
mathematical modelling, Lead induced increase of blood pressure in female lead workers, 734
measurement strategies, Design of measurement strategies for workplace exposures, 349
medical claims, Mental health insurance claims among spouses of frequent business travellers, 175
medical surveillance, Changes in rates and severity of compensation claims for asthma due to disocyanates: a possible effect of medical surveillance measures, 58
Decreased white blood cell counts in semiconductor manufacturing workers in Taiwan, 44
mental health, Ambient neighbourhood noise and children’s mental health, 380
Mental ill health and fitness for work, 714
merchant ships, Occupational accidents aboard merchant ships, 484
mercury, Health and neuropsychological functioning of dentists exposed to mercury, 287
Mercury and dentists, 285
Mortality from cardiovascular diseases and exposure to inorganic mercury, 494
mesothelioma, Translating evidence about occupational conditions into strategies for prevention, 205
meta-analysis, Neurobehavioural testing in workers occupationally exposed to lead: systematic review and meta-analysis of publications, 217
Risk of bladder cancer in foundry workers: a meta-analysis, 655
The EMECAM project: a multicentre study on air pollution and mortality in Spain: combined results for particulates and for sulphur dioxide, 300
metal fume fever, Fever and neutrophilic alveolitis caused by a vanadium based catalyst, 785
miner, Mortality from cardiovascular diseases and exposure to inorganic mercury, 494
MLS, Psychomotor performance and subjective symptoms at low level toluene exposure, 263
model of job demands and control, Job stress, fatigue, and job dissatisfaction in Dutch lorry drivers: towards an occupation specific model of job demands and control, 356
morbidity odds ratio, Increased morbidity from nasopharyngeal carcinoma and chronic pharyngitis or sinusitis among workers at a newspaper printing company, 18
mortality, Influence of years engaged in agriculture and number of pregnancies and deliveries on mortality of inhabitants of the Jinzu River basin area, Japan, 847
Mortality among Japanese construction workers in Mie Prefecture, 512
Mortality among US and UK veterans of the Persian Gulf War: a review, 794
Silicosis in the twenty first century, 721
Smoking and mortality in 81 344 drivers in Guangzhou, China, 135
Suicide mortality among electricians, 469
Temporal and spatial relations between age specific mortality and ambient air quality in the United States: regression results for counties, 1960–97, 156
The EMECAM project: a multicentre study on air pollution and mortality in Spain: combined results for particulates and for sulphur dioxide, 300
motor vehicle accident, Mortality among US and UK veterans of the Persian Gulf War: a review, 794
multiple chemical sensitivity, Reported chemical sensitivities in a health survey of United Kingdom military personnel, 196
municipal waste incineration worker, Polychlorinated dibenzo-p-dioxin and dibenzofuran concentrations in serum samples of workers at intermittently burning municipal waste incinerators in Japan, 362
musculoskeletal complaint, Pushing and pulling in association with low back and shoulder complaints, 696
musculoskeletal condition, Do musculoskeletal disorders matter? A study of absenteeism among care seeking Gulf War veterans with ill defined conditions and musculoskeletal disorders, 532
musculoskeletal disorders, A review of functional status measures for workers with upper extremity disorders, 664
m-xylene, Are women more sensitive than men to 2-propanol and m-xylene vapours?, 759
myocardial infarction, Myocardial infarction risk and occupational categories in Kaunas 25–64 year old men, 745
nasal inflammation, Respiratory symptoms, lung function, and nasal cellulity in Indonesian wood workers: a dose-response analysis, 336
nasal patency, Nasal patency is related to dust exposure in woodworkers, 23
nasopharyngeal carcinoma, Increased morbidity from nasopharyngeal carcinoma and chronic pharyngitis or sinusitis among workers at a newspaper printing company, 18
neck and shoulder pain, Chronic neck and shoulder pain, age, and working conditions: longitudinal results from a large random sample in France, 466
Work environment and neck and shoulder pain: the influence of exposure time. Results from a population based case-control study, 182
neurobehavioural testing, Neurobehavioural testing in workers occupationally exposed to lead: systematic review and meta-analysis of publications, 217
Neurobehavioural testing in workers occupationally exposed to lead, 648
neuropathy, A clinical neurological, neurophysiological, and neuro-psychological study of sheep farmers and dippers exposed to organophosphate pesticides, 434
neurophysiology, A clinical neurological, neurophysiological, and neuropsychological study of sheep farmers and dippers exposed to organophosphate pesticides, 434
neurotoxicity, Mercury and dentists, 285
Mercury and dentists, 285
NHANES III, Prevalence and risk factors of work related asthma by industry among United States workers: data from the third national health and nutrition examination survey (1988–94), 505
nitrogen dioxide, Personal exposure of Paris office workers to nitrogen dioxide and fine particles, 550
noise, Occupational exposure to noise and the attributable burden of hearing difficulties in Great Britain, 634
Translating evidence about occupational conditions into strategies for prevention, 205
non-fatal AMI, Overtime work, insufficient sleep, and risk of non-fatal acute myocardial infarction in Japanese men, 447
non-malignant respiratory disease, A cohort mortality and nested case-control study of French and Austrian talc workers, 98
Mortality from non-malignant respiratory disease in the fibreglass manufacturing industry, 369
nursing stress, Self perceived work related stress and the relation with salivary IgA and lysozyme among emergency department nurses, 836
occupation specific, Job stress, fatigue, and job dissatisfaction in Dutch lorry drivers: towards an occupation specific model of job demands and control, 356
occupational accidents, Occupational accidents aboard merchant ships, 85
occupational allergens, Detection of workers sensitised to high molecular weight allergens: a diagnostic study in laboratory animal workers, 189
occupational asthma, Changes in rates and severity of compensation claims for asthma due to disocyanates: a possible effect of medical surveillance measures, 88
Response to a case of occupational asthma due to the enzymes phytase and β-glucanase, 64
occupational cancer, Cancer mortality among man-made graphite electrode manufacturing workers: results of a 38 year follow up, 473
occupational cohort, An increased standardised mortality ratio for liver cancer among polyvinyl chloride workers in Taiwan, 405
occupational disease, Fever and neutrophilic alveolitis caused by a vanadium based catalyst, 785
occupational exposure, Cancer at sea: a case-control study among Finnish seafarers, 613
Chronic neck and shoulder pain, age, and working conditions: longitudinal results from a large random sample in France, 537
Occupational exposure assessment in case-control studies: opportunities for improvement, 575
Polychlorinated dibenzo-p-dioxin and dibenzofuran concentrations in serum samples of workers at intermittently burning municipal waste incinerators in Japan, 362
Relation between colour vision loss and occupational styrene exposure level, 624
Reported chemical sensitivities in a health survey of United King-
dom military personnel, 196
Risk of breast defects by parental occupational exposure to 50 Hz electromagnetic fields: a population based study, 92
Translating evidence about occupational conditions into strategies for prevention, 205

occupational health service, Out of hours management of occupational exposures to blood and body fluids in healthcare staff, 415
occupational health, Competency in occupational health, 647
occupational injury, Risk factors for occupational knee related disabil-
ity among enlisted women in the US Army, 601
occupational risk factor, Systemic sclerosis and occupational risk factors: a case–control study, 548
occupational vaccine, Critical evaluation of smallpox vaccination for laboratory workers, 573
occupation, Occupational risk of Lyme disease: an epidemiological review, 75
Respiratory symptoms and diseases among workers in the soft tissue producing industry, 830
Stomach cancer and occupation in Sweden: 1971–89, 329
Suicide mortality among electricians in the Swedish construction industry, 199
Working hours spent on repeated activities and prevalence of back pain, 680
offspring sex ratio, Offspring sex ratios of people exposed to dioxin and dioxin-like compounds, 202
operating theatre, Effectiveness of the hands-free technique in reducing operating theatre injuries, 703
ordered probit analyses, Do mental disorders matter? A study of absenteeism among care seeking Gulf War veterans with ill defined conditions and musculoskeletal disorders, 532
organic dust, Upper airway inflammation and respiratory symptoms in domestic waste collectors, 106
organophosphates, A clinical neurological, neurophysiological, and neuropsychological study of sheep farmers and dippers exposed to organophosphate pesticides, 434
painters, Nasal, eye, and skin irritation in dockyard painters, 64
Pakistan, The prevalence of occupational dermatitis in the UK printing industry, 487
parkinsonism, Translating evidence about occupational conditions into strategies for prevention, 205
particles, The EMECAM project: a multicentre study on air pollution and mortality in Spain: combined results for particulates and for sulfur dioxide, 300
passive smoking, Passive smoking and its impact on employers and employees in Hong Kong, 842
paternal occupational exposure, Review of recent epidemiologi-
cal studies on paternal occupations and birth defects, 149
PB, Persistent organic pollutant, Implementing the Stockholm Treaty on Persistent Organic Pollutants, 651
PCCD, Are incinerator workers exposed to PCDDs and PCDFs?, 649
PCDF, Are incinerator workers exposed to PCDDs and PCDFs?, 649
peripheral neuropathy, Criteria for the diagnosis of peripheral neuropathies, 425
permissible exposure limit, Silicosis in the twenty first century, 721
personal exposure monitoring, Implementing the Stockholm Treaty on Persistent Organic Pollutants, 651
personal exposure, Personal exposure monitoring of particulate matter, nitrogen dioxide, and carbon monoxide, including susceptible groups, 67
Personal exposure of Paris office workers to nitrogen dioxide and fine particles, 550
persulphate, Incidence of asthma in female Swedish hairdressers, 199
pesticide exposure, Knowledge, attitude, practice, and toxicity symptoms associated with pesticide use among farm workers in the Gaza Strip, 387
pesticide, Implementing the Stockholm Treaty on Persistent Organic Pollutants, 651
petroleum workers, Updated epidemiological study of workers at two California petroleum refineries, 1950–95, 248
physical work load, Pushing and pulling in association with low back and shoulder complaints, 696
phytase, Response to a case of occupational asthma due to the enzymes phytase and β-glucanase, 64
pilots, Cosmic rays: are air crew at risk?, 428
PM10, Personal exposure monitoring of particulate matter, nitrogen dioxide, and carbon monoxide, including susceptible groups, 67
PM2.5, Personal exposure of Paris office workers to nitrogen dioxide and fine particles, 550
pneumoconiosis, Non-malignant mortality among Norwegian silicon carbide smelter workers, 345
Respiratory morbidity in a population of French dental technicians, 396
poisoning, Episodes of environmental poisoning worldwide, 855
Poisson regression, Different responses of Ross River virus to cli-
mate variability between coastline and inland cities in Queens-
land, Australia, 739
polyneuropathy, Criteria for the diagnosis of peripheral neuropathies, 425
polyvinyl chloride, An increased standardised mortality ratio for liver cancer among polyvinyl chloride workers in Taiwan, 405
pooled analysis, Exposure-response analysis and risk assessment for silica and silicosis mortality in a pooled analysis of six cohorts, 723
post-exposure prophylaxis, Out of hours management of occupa-
tional exposures to blood and body fluids in healthcare staff, 415
posture, High physical work load and low job satisfaction increase the risk of sickness absence due to low back pain: results of a prospective cohort study, 323
practice, Knowledge, attitude, practice, and toxicity symptoms associated with pesticide use among farm workers in the Gaza Strip, 387
pregnancy outcome, Effects of paternal exposure to cadmium on pregnancy outcome and breast milk, 394
pregnancy, Influence of years engaged in agriculture and number of pregnancies and deliveries on mortality of inhabitants of the Jinzu River basin area, Japan, 847
preterm birth, Reproductive outcome among female hairdressers, 517
prevalence, The prevalence of occupational dermatitis in the UK printing industry, 487
prevention strategies, Translating evidence about occupational conditions into strategies for prevention, 205
prevention, Definition and assessment of specific occupational demands concerning lifting, pushing, and pulling based on a systematic literature search, 580
prevention of work related skin problems: an intervention study in wet work employees, 556
pulmonary function, The prevalence of occupational dermatitis in the UK printing industry, 487
printing works, increased morbidity from nasopharyngeal carcinoma and chronic pharyngitis for sinusitis among workers at a newspaper printing company, 18
psychological condition, Do mental disorders matter? A study of absenteeism among care-seeking Gulf War veterans with ill defined conditions and musculoskeletal disorders, 532
psychological contract, The changing psychological contract at work, 355
psychomotor performance, Health and neuropsychological functioning of dentists exposed to mercury, 287
psychomotor performance and subjective symptoms at low level exposure, 263
pulmonary function, Lung function over six years among professional divers, 629
pulp and paper mill, Effluents from a pulp and paper mill: a skin and health survey of children living in upstream and downstream villages, 373
quality, Indoor air quality guidelines, 73
quartz, Pulmonary epithelial response in the rat lung to instilled quartz, 487
radiotherapy, Cosmic rays: are air crew at risk?, 580
randomised clinical trial, Cost-benefit and cost-effectiveness analysis of a disability prevention model for back pain management: a six year follow up study, 807
Raynaud phenomenon, Raynaud phenomenon, vibration induced white finger, and difficulties in hearing, 640
repeated activities, Working hours spent on repeated activities and prevalence of back pain, 680
repeated measurement, Comparison of two different approaches for the analysis of data from a prospective cohort study; an application to work related risk factors for low back pain, 459
reproducibility of results, Occupational exposure assessment in case–control studies: opportunities for improvement, 575
reproducibility, Clinical validation of methods of diagnosis of neuropathy in a field study of United Kingdom sheep dippers, 442
respirable glass fibre exposure, Mortality from non-malignant respiratory disease in the fibreglass manufacturing industry, 365
respiratory diseases, The EMECAM project: a multicentre study on air pollution and mortality in Spain: combined results for particulates and for sulfur dioxide, 300
respiratory morbidity, Respiratory morbidity in a population of French dental technicians, 398
respiratory mortality, Associations between daily mortalities from respiratory and cardiovascular diseases and air pollution in Hong Kong, China, 30
respiratory problem, Importance of work intensity on respiratory problems in hairdressers, 649
respiratory symptoms, Upper airway inflammation and respiratory symptoms in domestic waste collectors, 106
return to work, Ineffective disability management by doctors is an obstacle for return-to-work: a cohort study on low back pain and workers sicklisted for 3–4 months, 729
risk assessment, Active epidemiological surveillance of musculoskeletal disorders in a shoe factory, 452
Exposure to crystalline silica, silicosis, and lung disease other than cancer in diatomaceous earth industry workers: a quantitative risk assessment, 36
Exposure-response analysis and risk assessment for silica and coal dust mortality in a pooled analysis of six cohorts, 723
risk chemical messages, Workers’ understanding of chemical risks: electroplating case study, 689
risk factors, Comparison of two different approaches for the analysis of data from a prospective cohort study; an application to work related risk factors for low back pain, 459
Rome, Competency in occupational health, 647
