10.1136/oemed-2018-ICOHabstracts.592

Introduction Exposure to biological agents occurs in many workplaces. Immunisation is a safe, cost-effective intervention for Vaccine Preventable Diseases (VPD). Although updated, evidence-based vaccination policies are available for the general population, overall there are few consensus recommendations for working populations apart from health care workers (HCWs).

Methods To evaluate current trends and evidence-based options, we performed a literature review of main online databases from 1997 to 2017, websites of various public...
