amongst employees in a large acute Hospital setting. The diversity of programme attendees is contributing to shared learning and networking across boundaries. By tapping into internal expertise and developing internal capacity to deliver the programme we have created a cost effective, sustainable model that is directly transferable to the wider health care setting.

474 PROJECT HAPPINESS AND WELLBEING FOR INDIAN OIL
Sandeep Sharma*, SK Awasthi. Indian Oil Corporation Ltd, New Delhi, India
10.1136/oemed-2018-ICOHabstracts.1654

Introduction The measures for enhancing ‘Wellbeing’ are complement to HSE measures to make sure that all workers are safe, healthy, controlled and are effectively engaged at work. In fact, Happiness and Wellbeing of the workforce is a key factor in any organisation’s long-term effectiveness.

Materials and methods Indian Oil Corporation has taken Happiness for their employees as a project and under this Project weekly questionnaire were started along with small reading material on various parameters which are the factors controlling our state of mind and ultimately effecting the one’s Happiness and Overall Well Being, Mental Attitude and Outlook, Time Management, Recognising and Managing Common Thinking Errors, Personal Wellbeing, Self Esteem and Self Confidence, Relationships for Health and Happiness, Positive and Negative Emotions, Burnout Factors in Your Work life, Health Fitness and Healthy Habits, Anger Management, Your Communication Style, Positive attitude and Gratitude. Project on ‘Happiness and wellbeing’ in Indian Oil focuses on the psychological aspects of a fulfilling and flourishing life and provides practical guidelines to enhance Happiness and Wellbeing. Indian Oil also launched a book prepared by Corporate HSE on ‘Happiness and Wellbeing’. Result In response to the weekly questionnaire on Happiness and Wellbeing, we received an overwhelming response and willingness from employees to join the Project Happiness and Well Being, which helped Indian Oil employees to understand fundamental issues in happiness and well-being, thereby making their official and personal life more meaningful, safe and effective. This program provides an insight into their mindsets and mental models that underlie their everyday behaviour and experience of life.

Discussion Project Happiness and Wellbeing brought more happiness in our management style, smile and look happy when you are at work, cultivate optimism; convey calm and faith in the future, in this way we create a much more efficient and adaptable organisation.

493 HEALTHY ENTERPRISE STANDARD (HES) EVALUATION: IMPACT ON LIFESTYLE HABITS AND SELF-RATED HEALTH

10.1136/oemed-2018-ICOHabstracts.1656

Introduction A significant portion of the burden of illness among workers in Canada and the United States is attributable to poor lifestyle habits, namely smoking, physical inactivity and low consumption of fruits and vegetables. The Healthy Enterprise Standard (HES) targets four intervention areas, including one to promote healthy lifestyle habits. The aim of this study was to evaluate the impact of HES implementation on workers’ smoking behaviour, physical activity, consumption of fruits and vegetables as well as their self-rated health status.

Methods This was an intervention study with a before-after design derived from secondary data. Organisations adopted the standard of their own initiative and were responsible for implementing interventions. All active employees of ten Quebec organisations were solicited to participate before (T1 = 2849) and 24–38 months (T2 = 2560) following the standard’s implementation. Smoking status, weekly frequency of physical activity and daily fruit and vegetable consumption...
