illness play an important role in the context. Leaders serve as role models and therefore tend to have a huge impact on the pressure perceived by employees. Moreover, support from management, leadership qualities as well as leadership style tend to be an issue. Correlations often were no longer significant when other variables such as health problems, demographic variables or organisational factors were incorporated.

Discussion Results from quantitative and qualitative studies suggest that there is a correlation between leadership and presenteeism. However, results are not conclusive. Moreover, significant correlations disappeared when multivariate analyses were undertaken. Thus, results have to be interpreted with care.

446 NIGHT WORK AND COMMON MENTAL DISORDERS: ANALYSING OBSERVATIONAL DATA AS A NON-RANDOMISED PSEUDO TRIAL

Abstracts
